1.51 2015-10-30

- Introduced description lists via new Text::Amuse
- Introduced production of slides via new Text::Amuse::Compile
- Slides are supported in the bookbuilder as well (single file)
- Improved commit versions and crediting in the archive git history
- Selection of slides themes and colors in the admin
- Selection of mono and sans fonts in the admin

1.56 2015-12-02
- Handle long author names (via bumped up Text::Amuse::Compile)
- Added headings option to the bookbuilder (buggy, probably impossible to fix)
- Updated i18n files

1.55 2015-12-01
- Fixed git command for older gits

1.54 2015-12-01
- Moved the files produced by the bookbuilder into a private directory (#27)
- Added UI to add remotes to the repo (#18)

1.53 2015-11-23
- Added option to upload an HTML file instead of pasting the body (#22)
- Doc fixes (#22)
- Hide the filters by default (#23)
- Log user agent and referrer on 404 (#24)
- Try not to hit the session without a reason (#25)

1.52 2015-10-30
- Fixed bug due to bad file extension parsing, which was excluding some files after a pulling.
