Overview

There are no upgrade or backcompatibility issues with the 2.5 series.

2.604 2025-03-02

- Xapian search and indexing: make the search insensitive to diacritics. You should reindex the sites with `amusewiki-bootstrap-archive --xapian` after the upgrade.

2.603 2025-01-16

- Xapian indexing: give more relevance to titles and author
- Upgrade forkawesome to final version
- Improve translation UI

2.602 2024-10-21

- Improve bookbuilder session loading
- Add a max requests to the FCGI process manager

2.601 2024-10-04

- Add new options for federated sites acting as a pure mirror (remove local and vanished files from upstream)

2.600 2024-08-26

- Improve bookcover stock template
- When generating and EPUB in the bookbuild, also produce HTML
- i18n: tr (updated, thanks to @rojenzaman)
