

**Version 1.8**

Version 1.8  
2016-06-12

[amusewiki.org](http://amusewiki.org)

2016-06-12

## Version 1.801 (2016-04-22)

- Added help page for OPDS

## Version 1.800 (2016-04-22)

- Decoupled the localization framework from the application
- Completed translations: fr and mk.
- Updated dependencies Text::Amuse and Text::Amuse::Preprocessor

The upgrade should be transparent, but please see LOCALIZATION.txt for details if you are using the `lexicon.json` file to override localization. Otherwise there is no action to take.

# Contents

Version 1.826 (2016-06-12) . . . . .	5
Version 1.821 (2016-05-10) . . . . .	5
Version 1.811 (2016-05-01) . . . . .	5
Version 1.801 (2016-04-22) . . . . .	6
Version 1.800 (2016-04-22) . . . . .	6

## **Version 1.826 (2016-06-12)**

- Adjusted the statistics under /stats/popular
- Documentation fixes
- Improved notifications on the upload process
- Added documentation for 0-downtime upgrades
- Debian packages now come with the 0-downtime upgrade feature built-in

## **Version 1.821 (2016-05-10)**

- Added reset password by mail (#48)
- Added admin role which is able to set most of the site settings (#49)
- Added experimental popular sorting (#44)
- Add HTTP auth for robots on private sites (#50)
- UI improvements (number of texts pending on the bookbuilder)
- Updated translations: fr, it, hr
- Updated documentation

## **Version 1.811 (2016-05-01)**

- Decoupled mail sending from the application [INTERNAL]
- Optimized /opds/crawable
- Removed simp\_le from the stack and use Protocol::ACME instead (see the Let's Encrypt section of the README)
- Updated localization

If you are the simp\_le cronjobs in place, please remove them, as the certificate renewal is already taken care of by the amusewiki daemon.
